

COI TRACKER

From Missing Certificates to Measurable Compliance.

COI Tracker unifies policy standards, document review, tenant outreach, and reporting into one operating system for property compliance.

Compliance Command Center

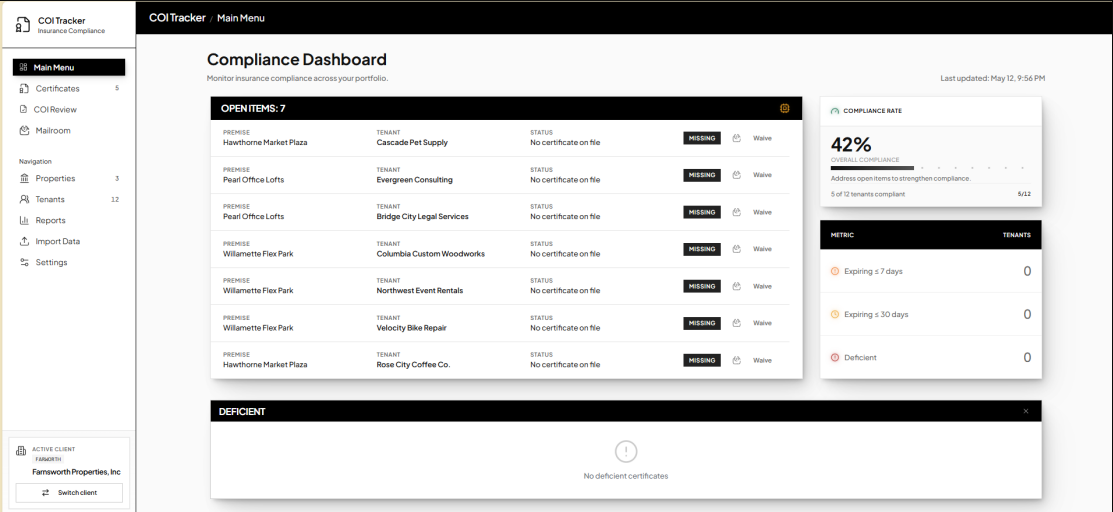

The Compliance Dashboard gives operations teams a single command center for insurance risk. Open items, tenant-level status, and portfolio KPIs are surfaced in one view so teams can prioritize remediation instantly instead of hunting across spreadsheets and inboxes.

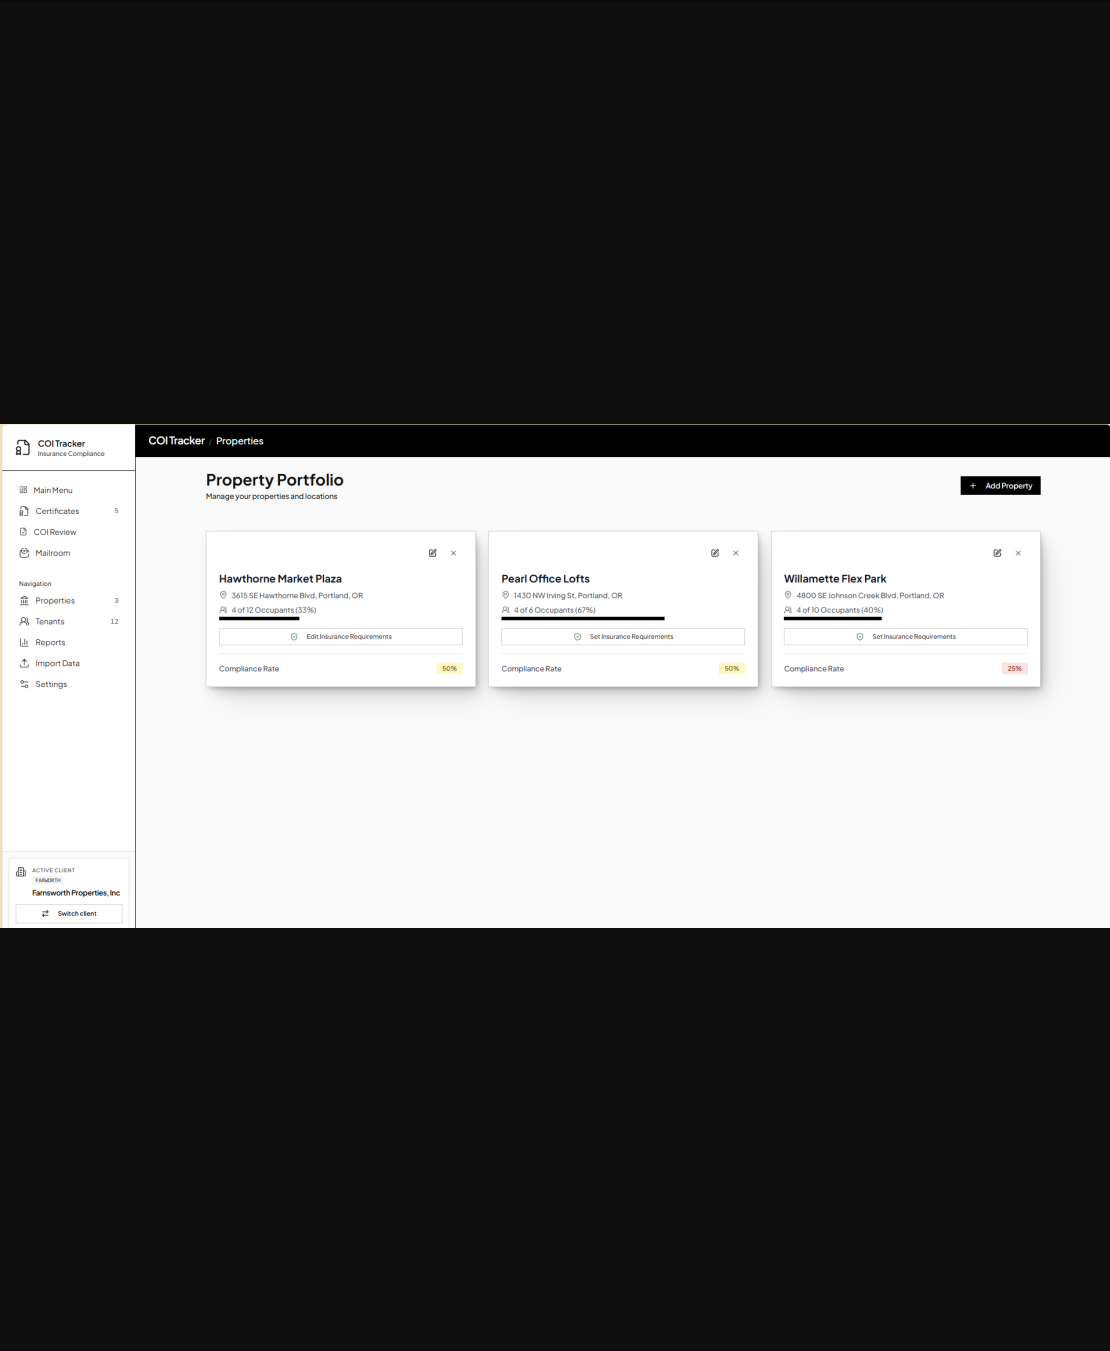

PRIMARY FEATURES

- Open Items queue with tenant-level actions
- Live compliance KPI panel (overall compliance)
- Aging buckets (expiring, deficient)

OPERATIONAL CALLOUTS

- Immediate "missing certificate" visibility
- Direct "waive" action routing
- Timestamped data freshness

Property Portfolio Overview

Property Portfolio turns scattered site data into a clear compliance map. Teams can compare each location’s occupancy and certificate readiness, then drill into exactly where policy enforcement needs to tighten.

PRIMARY FEATURES

- Property cards with occupancy progress
- Compliance rate by location
- Quick actions (edit requirements/property controls)

OPERATIONAL CALLOUTS

- Building-by-building risk segmentation
- At-a-glance tenant occupancy/compliance relationship

Tenant Compliance Operations

Tenant Management centralizes every tenant record, contact, and compliance state in one operational grid. From one screen, teams can trigger outreach, upload updated certificates, and close gaps faster.

PRIMARY FEATURES

- Tenant roster with compliance tags
- Contact details embedded in table
- Action shortcuts (email, upload COI, edit)

OPERATIONAL CALLOUTS

- Bulk-friendly tabular operations
- Fast outreach from operational context
- Compliance segmentation at the tenant record level

Certificate Registry & Endorsement Validation

The Certificates view provides an auditable, portfolio-wide registry of every COI with validation status, expiration windows, and endorsement checks. Teams gain a defensible record of what's compliant now and what needs remediation next.

PRIMARY FEATURES

- Certificate index by tenant and property
- Effective/expiration timelines with remaining days
- Endorsement legend (AI/WOS/PNC)

OPERATIONAL CALLOUTS

- Standardized validation states (validated/pending/rejected)
- Archive handling for older documents
- Coverage endorsement readability for non-technical users

LEGEND

VALIDATED

Reviewed and meets the property's insurance requirements.

PENDING

Uploaded, not yet reviewed.

DEFICIENT

Reviewed — missing or insufficient required coverage.

REJECTED

Not accepted as a valid certificate.

AI

Additional insured endorsement on the policy.

WOS

Waiver of Subrogation in favor of the landlord.

PNC

Primary & Non-Contributory wording.

—

None detected on this certificate.

Insurance Requirement Policy Builder

Set Insurance Requirements lets teams codify policy expectations at the property level, including limits and mandatory endorsements. This ensures every incoming certificate is evaluated against a clear, repeatable standard.

PRIMARY FEATURES

- Certificate holder identity and address
- Minimum limits (GL, aggregate, excess/umbrella)
- Required provisions (AI, WOS, PNC)

OPERATIONAL CALLOUTS

- Required wording/operations clause
- Property-specific policy baselining
- Saveable requirement profiles

 Set Insurance Requirements

×

Configure certificate holder and minimum limits for Hawthorne Market Plaza.

Certificate Holder Name

Hawthorne Market Plaza

Certificate Holder Address

3615 SE Hawthorne Blvd, Portland, OR, 97214

Minimum Limits

GL (each occurrence)

2,000,000

GL (aggregate)

4,000,000

Excess/Umbrella

5,000,000

☒ Allow excess/umbrella to cover GL shortfall

Required Provisions

☒ Additional Insured (AI)

☒ Waiver of Subrogation (WOS)

☒ Primary & Non-Contributory (PNC)

Description of Operations (required wording)

e.g. Tenant operations at [Property Name]

Property Record Management

Edit Property provides a complete management record for each location, including operating details and key contacts. Clean property metadata improves matching, outreach quality, and compliance accountability.

PRIMARY FEATURES

- Editable property profile fields
- Manager/contact information
- Optional sample COI document upload

OPERATIONAL CALLOUTS

- Data normalization for downstream workflows
- Property-level communication context
- COI sample attachment support

AI-Powered COI Review Workspace

COI Review is the intake engine where incoming documents become actionable compliance data. Teams can upload at scale and run standardized analysis workflows to accelerate validation and exception handling.

PRIMARY FEATURES

- Drag/drop COI ingestion (PDF/JPG/PNG)
- Review queue panel
- Mechanical + AI-assisted processing surface

OPERATIONAL CALLOUTS

- Batch-friendly upload behavior
- Visual staging area for review sessions
- Ready for extraction/matching/analyze pipeline

Mailroom Thread Operations

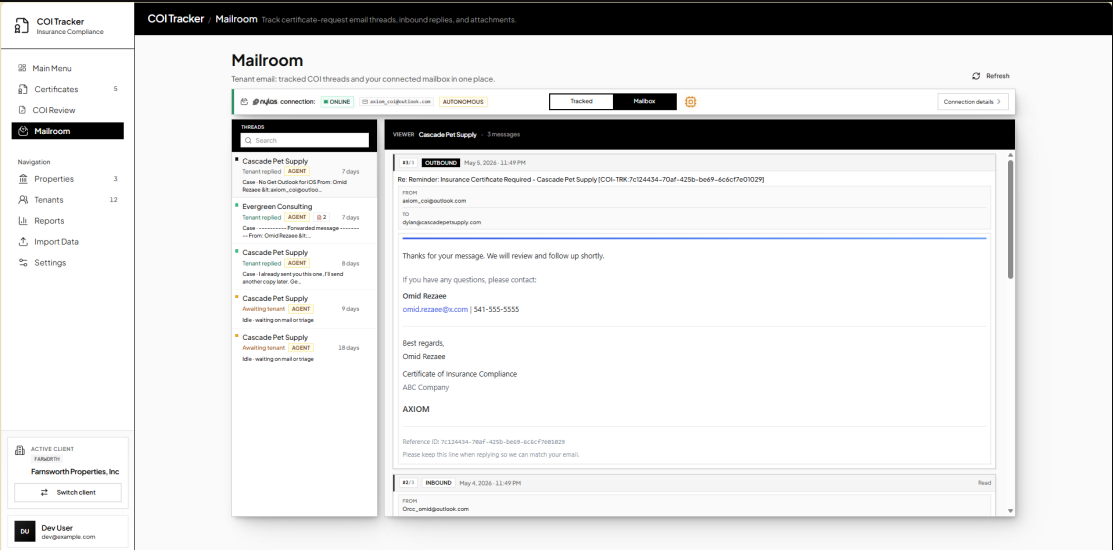

Mailroom unifies outbound requests and inbound tenant responses into a single thread-centric workspace. Teams can track every certificate conversation lifecycle without leaving the compliance platform.

PRIMARY FEATURES

- Tracked tenant thread list
- Full conversation viewer
- Tabs for tracked threads, autonomous mode, mailbox

OPERATIONAL CALLOUTS

- Bi-directional thread context
- Deficiency follow-up history in one pane
- Refresh and thread-level controls

DEDICATED AGENT

Mailroom automation
Choose autonomous mode or keep review gates.

MODE

Autonomous (no review) ☒

AI sends contextual tenant replies automatically.

AUTOMATION

Monitor threads ☐

Queue PDF/image attachments for COI review ☒

REPLY RULES

Auto-send deficiency emails ☐

Always CC

Use commas or spaces to separate emails.

Require approval when compliant ☐

Require approval before AI sends replies ☐

Save preferences

Dedicated Agent Automation Controls

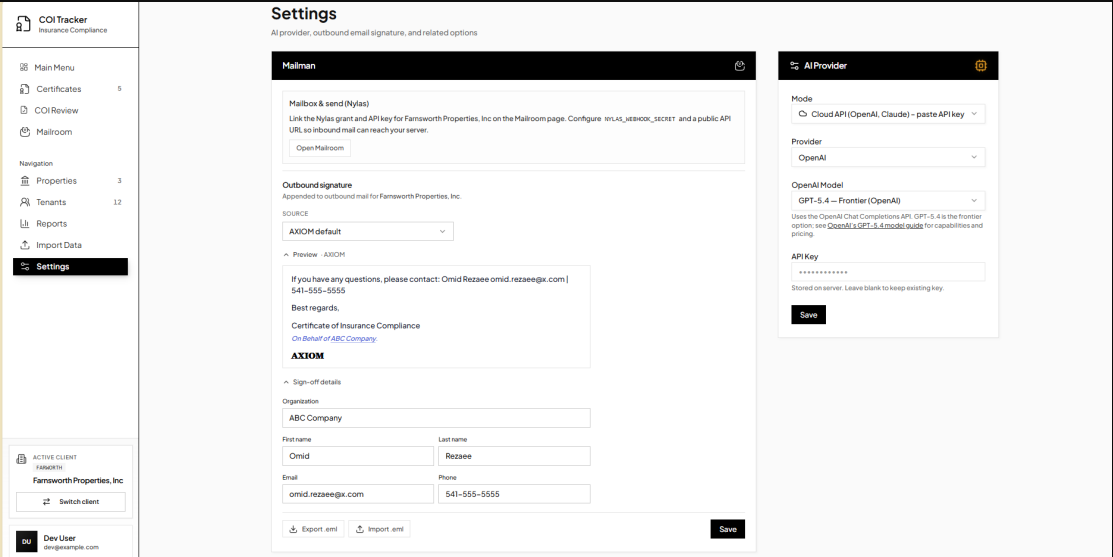

Dedicated Agent settings let teams automate repetitive tenant follow-up while preserving governance. Operations can choose where AI acts autonomously and where human approval remains required.

PRIMARY FEATURES

- Mode selection (autonomous vs review-gated)
- Attachment monitoring and COI queue toggles
- Deficiency reply rules and approval gates

OPERATIONAL CALLOUTS

- Always-CC controls
- Policy-aware send restrictions
- Granular automation preference management

Platform Settings & AI Configuration

Settings centralizes platform governance: email infrastructure, outbound identity, and AI model controls. Teams can align communication quality and AI behavior to operational policy.

PRIMARY FEATURES

- Mailbox/send integration settings
- Outbound signature builder/preview
- AI provider/model/API key controls

OPERATIONAL CALLOUTS

- Signature import/export workflows
- Model/provider flexibility
- Admin-level configuration in one surface

Bulk Import & Portfolio Onboarding

Import Data accelerates onboarding by turning existing spreadsheets into structured compliance records. Teams can launch quickly with guided templates, paste workflows, and batch ingestion pathways.

PRIMARY FEATURES

- CSV import templates and instructions
- Drag/drop ingestion and Excel paste support
- Multiple import modes (properties, tenants, batch COI)

OPERATIONAL CALLOUTS

- Reduced setup friction for new portfolios
- Structured ingestion for cleaner downstream operations

Import Data

Import properties and tenants from spreadsheets, or upload COI certificates in bulk.

 **Properties**
CSV Import

 **Tenants**
Excel or CSV

 **Batch COI Upload**
PDF or Images

1. Download template
CSV format with required columns

Download

2. Fill in your data

- Required: Property Name and Address
- Property Type: retail, office, industrial, mixed_use, other
- Save as CSV (File → Save As → CSV)

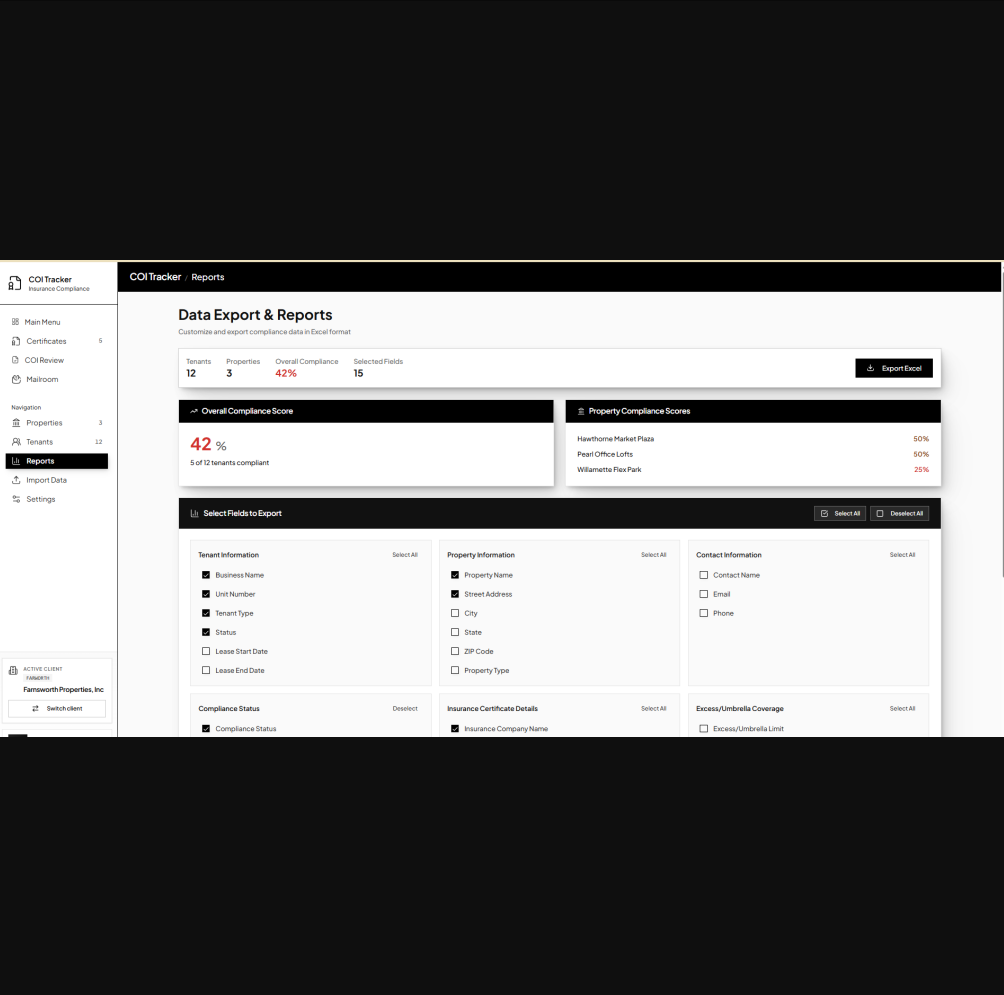

3. Upload your file

Drag & drop or click to browse
CSV files only

Or paste from Excel

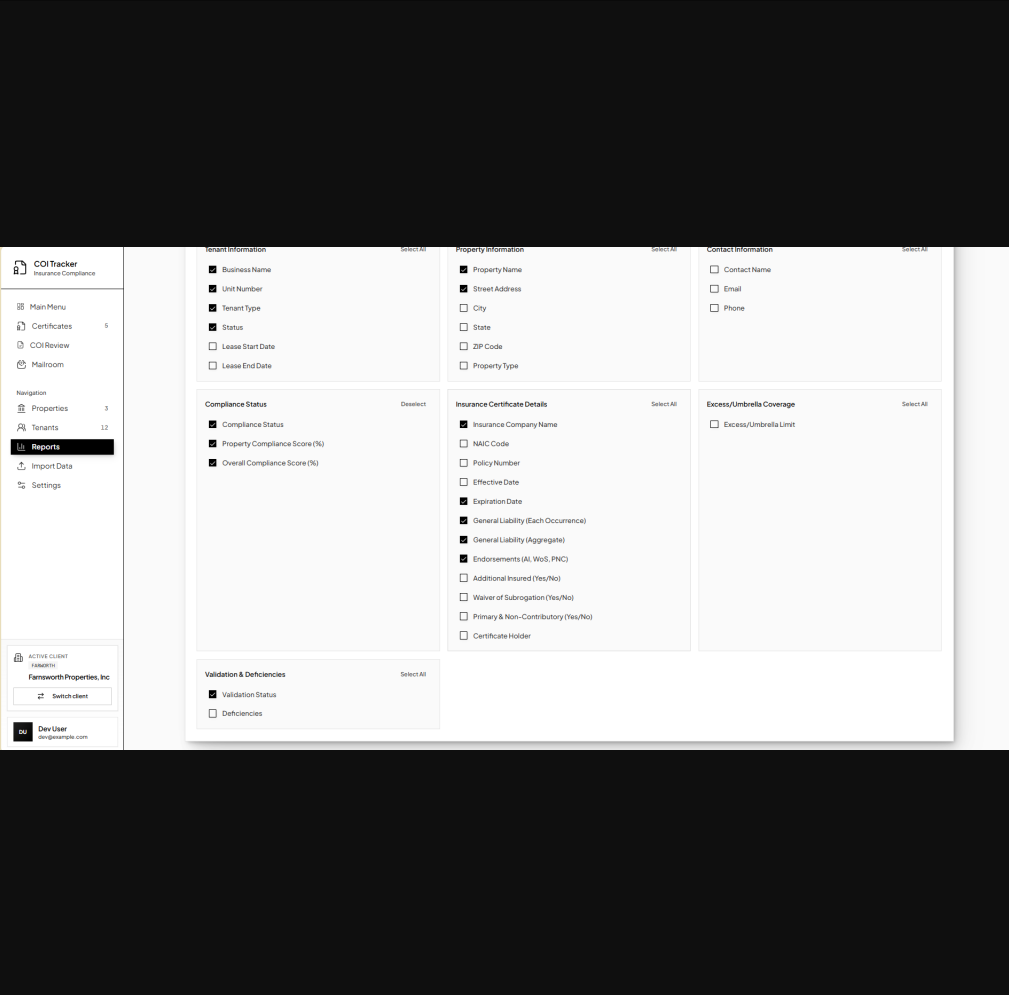

Paste tab or comma-separated data here (first row = headers: Property Name, Address, City, State, etc.)

Import pasted data

Executive Reporting & Export

Data Export & Reports turns operational compliance data into executive-ready reporting. Leadership can measure portfolio risk, compare property performance, and export audit-friendly datasets instantly.

Report Builder Field Selection

The report field selector gives teams control over exactly what each export communicates, from summary metrics to granular validation evidence. This supports tailored reporting for operations, ownership, and compliance audits.

Property Portfolio (Alternate Crop)

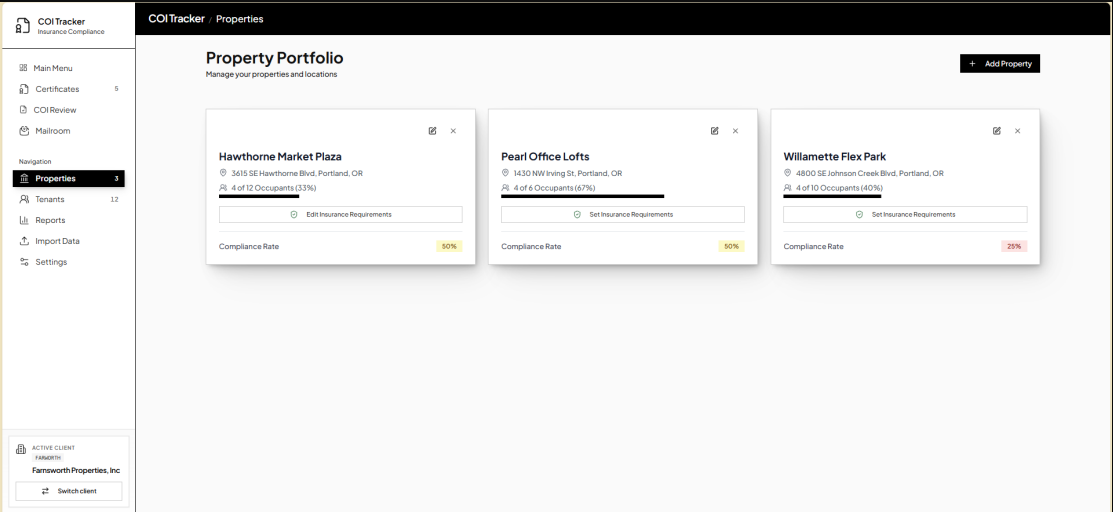

Alternative crop of the property command view for flexible booklet layout.

PRIMARY FEATURES

- Same as Asset 02

OPERATIONAL CALLOUTS

- Use as optional duplicate if spread needs balancing

Standardize your COI workflow. Reduce follow-up churn. Prove compliance with confidence.
