

The screenshot displays the 'DEDICATED AGENT' settings for 'Mailroom automation'. The interface is divided into several sections: 'MODE' with a toggle for 'Autonomous (no review)' (currently off), 'AUTOMATION' with toggles for 'Monitor threads' (off) and 'Queue PDF/image attachments for COI review' (on), 'REPLY RULES' with a toggle for 'Auto-send deficiency emails' (off), and an 'Always CC' section with a text input field containing 'you@company.com, compliance@compa' and a note to 'Use commas or spaces to separate emails.'. Below these are two more toggles: 'Require approval when compliant' (off) and 'Require approval before AI sends replies' (off). A 'Save preferences' button is at the bottom.

DEDICATED AGENT
Mailroom automation
Choose autonomous mode or keep review gates.

MODE
Autonomous (no review) ☐
AI sends contextual tenant replies automatically.

AUTOMATION
Monitor threads ☐
Queue PDF/image attachments for COI review ☒

REPLY RULES
Auto-send deficiency emails ☐

Always CC
you@company.com, compliance@compa
Use commas or spaces to separate emails.

Require approval when compliant ☐
Require approval before AI sends replies ☐

Dedicated Agent Automation Controls

Dedicated Agent settings let teams automate repetitive tenant follow-up while preserving governance. Operations can choose where AI acts autonomously and where human approval remains required.

PRIMARY FEATURES

- Mode selection (autonomous vs review-gated)
- Attachment monitoring and COI queue toggles
- Deficiency reply rules and approval gates

OPERATIONAL CALLOUTS

- Always-CC controls
- Policy-aware send restrictions
- Granular automation preference management
