2 Run your agent

Combine the prompt with policy PDFs in Claude, GPT, or your stack of choice.

3 Upload JSON

Save .txt or .json output, then use Upload on that line in the table.

All Coverages in One View

GL, Auto, Property, WC, and Umbrella on one screen — dates, carriers, limits, exposures, and premiums.

PRIMARY FEATURES

- AI extraction or guided manual import per line
- One-click exposure workbooks and BOR letters
- MODE toggle: AI or manual, same outputs

OPERATIONAL CALLOUTS

- Whole program visible in minutes
- Hybrid automation: speed or auditability

2	3CZU45L10G551970	2019	Ram	2500	Pickup	TRUCK	Intermediate-200	11	OR	1000

Detailed Exposure Views

Underwriter-ready schedules by line — GL locations, Auto fleet with NHTSA VIN check, WC payroll totals.

PRIMARY FEATURES

- Sortable GL and Auto tables with Excel export
- NHTSA VIN validation with one-click corrections
- WC class codes with grand-total payroll

OPERATIONAL CALLOUTS

- One model across Portfolio, Assistant, and Broker Connect
- Raw JSON tab on every line

NHTSA VIN CHECK

NHTSA VIN Check — VINs decoded via NHTSA vPIC; make, model, and type compared to your schedule.

Broker Connect

Endorsements, COIs, and renewal applications in one traceable flow with numbered outbound records.

PRIMARY FEATURES

- Stack portfolio-wide changes into one broker email
- Upload carrier forms and stage renewal docs
- COI requests with COI-1 · END-1 tracker

OPERATIONAL CALLOUTS

- One transaction across the portfolio
- Request history without leaving the app

Insurance Email Inside the Workflow

Outlook via Nylas — Inbox, Sent, and compose beside your portfolio imports.

PRIMARY FEATURES

- Reply or compose with attachments and thread tagging
- COI threads tied to workspace context
- Integrated with Broker Connect outbound tracker

OPERATIONAL CALLOUTS

- Email stays inside operations
- API keys stay server-side

Assistant

Coverage intelligence in the same workspace — General Chat grounded in your session, Compliance for contract review.

PRIMARY FEATURES

- Cloud or offline AI model choice
- Compliance: upload contracts, map gaps, export to broker

OPERATIONAL CALLOUTS

- Grounded on vault facts, not invented limits
- Offline mode for data residency

Review complete

Requirement	test-insurance-requirements
Provide Additional Insured status on the General Liability policy in favor of the required upstream party or certificate holder.	Non_compliant I could not find an additional insured endorsement on your GL coverage naming the required upstream party or certificate holder. Your GL information shows the core limits, but it does not show this contract-required status, so you would need the specific endorsement to satisfy this. Declarations (p. 1)
Provide Primary and Non-Contributory wording on the General Liability coverage in favor of the required upstream party or certificate holder.	Non_compliant I could not find primary and non-contributory wording on your GL coverage for the required upstream party or certificate holder. To meet this requirement, your GL policy usually needs a specific endorsement showing that wording. Declarations (p. 1)
Provide a Per Project / Per Location Aggregate on the General Liability policy.	Non_compliant Your GL coverage shows a \$2,000,000 general aggregate, but I could not find wording that makes it apply on a per project or per location basis. That usually requires a specific endorsement, and I did not see one here. Declarations (p. 1)
Maintain Business Automobile Liability insurance covering owned, non-owned, and hired vehicles with a combined single limit of not less than \$1,000,000 per accident.	Partial Your auto coverage shows a \$1,000,000 liability limit, which matches the required amount. But the record I reviewed does not clearly confirm owned, hired, and non-owned auto coverage wording together, so you may need the full auto policy or endorsement schedule to prove this requirement completely. Business Auto coverage structure - Auto liability limit \$1,000,000
Provide Waiver of	Partial

Review complete

Maintain Business Automobile Liability insurance covering owned, non-owned, and hired vehicles with a combined single limit of not less than \$1,000,000 per accident.	Partial Your auto coverage shows a \$1,000,000 liability limit, which matches the required amount. But the record I reviewed does not clearly confirm owned, hired, and non-owned auto coverage wording together, so you may need the full auto policy or endorsement schedule to prove this requirement completely. Business Auto coverage structure - Auto liability limit \$1,000,000
Provide Waiver of Subrogation in favor of the required upstream party or certificate holder.	Partial Your workers compensation coverage includes a waiver of subrogation endorsement, which helps for that line. But I could not confirm the same protection on your GL coverage or other applicable liability lines in favor of the required upstream party or certificate holder, so this is not fully supported yet. WC 99 06 13 - Forms Schedule p.7
Maintain Completed Operations coverage for 3 years.	Partial Your GL coverage includes products-completed operations aggregate coverage during the policy term, but I could not find language showing completed operations will be maintained for 3 years. This usually needs to be confirmed by contract compliance tracking, renewal evidence, or a separate commitment rather than the current GL declarations alone. Declarations (p. 1)
Provide evidence of required insurance before work begins, including a certificate of insurance and any required endorsements that clearly show the required coverages, limits, and policy conditions.	Partial You have policy evidence showing the main GL limits, workers compensation, employers liability, and umbrella limits. But I could not confirm a certificate of insurance and the required endorsements showing additional insured status, primary and non-contributory wording, per project or per location aggregate, and any other required conditions. Before work begins, you would want those documents assembled so the contract requirements are clearly shown. Declarations (p. 1) - WC_POLICY_2026.pdf - Umbrella declarations p.1

Partial matches

Partial when limits almost align but endorsements or waivers still need broker follow-up.

\$2,000,000 general aggregate, and \$2,000,000 products-completed operations aggregate.	
Maintain Workers' Compensation insurance as required by applicable law.	Compliant Your workers compensation is statutory. WC Coverage Part p.6
Maintain Employers Liability insurance with limits of not less than \$1,000,000 each accident, \$1,000,000 disease-policy limit, and \$1,000,000 disease-each employee.	Compliant Your employers liability limits match exactly. Declarations p.1
Maintain Umbrella/Excess Liability insurance with limits of not less than \$5,000,000 per occurrence and \$5,000,000 aggregate.	Compliant Your umbrella limits exceed the requirement. Umbrella declarations p.1

Run another analysis

Re-checks your uploaded contracts against your portfolio. Add or remove files in the panel on the right first if you need a different set.

Compliant requirements

Compliant rows confirm limits meet contract language. Export Excel and send to your broker.

Insurance operations with intelligence built in

AXIOM Insurance Manager turns policy PDFs and email threads into one auditable portfolio — then moves COIs, endorsements, and applications through Broker Connect and Mailman on infrastructure you already trust.
